How to Kasher an Airbnb

Many people are surprised to learn that kashering an Airbnb for a short stay is actually very simple. You don't need to stress or spend hours cleaning and boiling everything. Here's what matters—and what doesn't.

What Needs to Be Kashered?

Only **metal items** that are **used directly on a flame or in an oven** need kashering. That includes:

- Pots and pans
- Oven trays
- BBQ grills
- Metal ladles or large metal serving spoons if used for stirring hot food

That's it.

What Does *Not* Need Kashering?

You can use all of the following without kashering:

- Dishes, silverware (even metal forks, spoons, and knives, since not normally used for cooking)
- Glass, plastic, Corelle, or Pyrex
- Oven itself
- Stove top grates
- Refrigerator, freezer, counters, microwave, dishwasher

- Toaster, blender, and stand mixers
- Cups, glasses, mugs
- Tables and cutting boards

Just wipe them clean. In most Airbnbs, these items are already clean because they're rented out to guests.

How to Kasher What Needs Kashering

For Pots and Pans:

- 1. Make sure they're clean.
- 2. Put them empty on a lit burner.
- 3. Wait until it gets so hot that water drops sizzle when you sprinkle them on.
- 4. That's it. It's kashered.

For Metal Utensils (Ladles & Cooking Utensils) (Hagalah):

- 1. Fill a large pot with water and bring it to a boil.
- 2. Submerge each utensil fully. If too large, dip half and then the other half.
- 3. Immediately rinse with cold water.

For a BBQ Grill:

- 1. Scrub it clean.
- 2. Turn it on high for about 3 minutes until it's very hot.
- 3. Done.

No need to wait 24 hours as long as you use Libun (direct fire).

For an oven tray or pan:

Put them all in the oven at the same time; empty and on high for twenty minutes.

Final Thoughts

This entire process usually takes **10 to 20 minutes**—and you're ready to go for the weekend. Don't obsess over kashering things that don't require it. Jewish law is practical and reasonable.
